

Greener Choices for the Kitchen and Dining Room: Part 2

**Imprint Comfort Mat**

The Imprint Comfort Mat is an amazing, eco-friendly addition to any kitchen. It's an ergonomic anti-fatigue floor mat that cushions your feet, alleviating back and foot pain when standing on a hard surface for extended periods of time.

Imprint makes the mats from an environmentally friendly, non-toxic material that's treated with an antimicrobial agent that makes it resistant to mold and mildew.

The mats don't use any phthalates, formaldehyde or other toxic heavy metals in production, and they carry a 7-year warranty.

I'm someone who spends long hours in the kitchen standing on tile floor, and I adore the squishy, comfy anti-fatigue cushioning technology. You can literally see the "imprint" of your feet in the mat, and you can clean up any spills with plain soap and water.

The Imprint Comfort Mat comes in several sizes, color options and textures, so there's something for every décor!

**Food Wash & Dryer Kit**

According to EAT CLEANER™, simply rinsing the foods you eat isn't enough to protect from the potential of foodborne illness. Water isn't necessarily effective in removing waxes and bacteria from the exterior of foods.

EAT CLEANER™ is an all-natural, lab-tested food cleaner that washes off surface contaminants, pesticides, waxes and organic particles. It can be used for processed meats, seafood and poultry in addition to produce.

The all-natural formula features ingredients that are Generally Recognized As Safe by the FDA and don't impart any taste or odors to food. Plus, EAT CLEANER™ uses low-impact packaging like recyclable plastic bottles, compostable wipes and concentrate refills.

The Wash & Dryer Kit is a great way to get started, since it contains the Fresh Produce Wash, the Vegetable Scrub Brush and the Strainer Basket. You can also purchase EAT CLEANER™ products individually.

**Meshy hotSACKS**

Next time you're at the farmers' market or grocery store, use Meshy hotSACKS for your produce or bulk items instead of those

disposable plastic produce bags.

These reusable mesh bags are fully recyclable and are made from 100% polyethylene resin. Each bag is strong enough to hold a dozen apples!

Meshy hotSACKS come in sets of 8 bags and come in orange, purple, blue and green.

### Compost System

The newly introduced SOLON™ Compost System from BLANCO is a sleek and stylish recycled stainless steel in-counter system for collecting organic waste.

The SOLON™ installs into any countertop (usually next to a sink) with a virtually seamless appearance and has a lid with a hygienic neoprene seal to contain odors.

Simply collect organic waste like egg shells, vegetable peels, coffee grounds, etc., inside and let the

composting begin!

SOLON™ is easy to clean and dishwasher safe, as well as an elegant but eco-friendly addition to your kitchen.

### Corkologie™ Wine Rack

Wine lovers certainly appreciate cork, and now they can store and display their bottles with a wine rack made exclusively from natural cork.

The Corkologie™ Wine Rack is modular, so you can continue to expand as your collection grows.

Cork is sustainable, plentiful (especially in Portugal), 100% recyclable and biodegradable, and supportive (providing jobs for more than 100,000 people in Portugal alone and supporting other eco-systems

around the globe).

In short, Cork is Cool™ - and these wine racks are nothing short of unique.
